

NINA WINTERS SCULPTOR - NEW HUMANITARIAN PROJECT

ZIMBABWE SOLAR AND REFORESTATION PROJECT

"Empowering Villages through Solar Oven Making: A Journey of Sustainability, Prosperity, and Reforestation"

Hi guys! Here's a bit of history:

I recently met a woman named Susan Kinne who brought a village in Nicaragua to sustainability and prosperity and also prevented the destruction of the forests by introducing **solar oven-making** to this one village. She taught all the women of this village this trade. She has been there with them ever since, decades!!

This activity of solar oven making **IS A KEY** to creating **self-sustaining villages in Africa**.

My great friend Oby is going to spearhead this crusade in Zimbabwe with my help.

He is extremely qualified as he is a professional welder and was the welder who helped me create my 6-foot Lion statue in South Africa.

So we have the actual manual from Susan Kinne and are raising money to make a prototype of the oven. We need to purchase all the tools and materials for the first one. I am posting this in the hopes my friends can help with financial donations (anything will be appreciated) towards the project.

Once we have the prototype, all the villagers can see how it works, and the idea is to then have them as a team create an oven for each family in the village.

The project goal is that this first village will have stopped decimating their forests, all are cooking with their solar ovens and reforestation has begun. **This village will become the model village in Zimbabwe.**

It also will give Oby's village a solar oven-making business, which will help **solve the unemployment crisis** his people are in. They do have crops, livestock and gardens but they have no income for buying other things like clothing, soap, salt etc.

HELP THIS SOLAR OVEN PROJECT!!

I will keep you updated with continuous news and photos and videos!!!!
