

NINA WINTERS SCULPTOR  
- NEW HUMANITARIAN PROJECT

## ZIMBABWE SOLAR AND REFORESTATION PROJECT

"Empowering Villages through Solar Oven  
Making: A Journey of Sustainability, Prosperity,  
and Reforestation"

### Tree nursery

"I did the tree nursery myself. It consists of indigenous trees, exotic mango guava, apples, lemons, and berries. I will transplant them after one month. They grow faster than within five years. We can eat the fruits by planting these trees. It will help our reforestation project since I have prepared almost 500 nurseries, and if they grow big, we will plant them along water channels and around homes."

- Primacy (Obry's wife)

### Obry's wife

### HELP THIS SOLAR OVEN PROJECT

#### About the project:

Obry is creating a prototype solar oven that will help prevent excessive use of wood for cooking which has destroyed most of the forest.

We will cook with sun and work to reforest our world.

*Any contributions will be very much appreciated.*

*Please donate 100 dollars to help expand this project.*

Obry and Nina

Let's give these families an amazing Christmas!

To donate please visit [www.ninawinters.com](http://www.ninawinters.com)  
and go to "About the Humanitarian" page.

I will keep you updated with continuous news and photos and videos.

Love,
